The processed woods are very important for the sound of guitars. For this reason, only selected timbers have been used for the CASCHA concert guitar. The top of the guitar is made of laminated spruce wood for a warm sound. The back and sides are made of high quality lime wood, the neck of the guitar is made of okoume wood. Fingerboard and bridge are made of durable composite wood. These precious woods not only provide an excellent sound, but also make the CASCHA concert guitar an optical highlight!

Instrumental Methods

With Cascha methods you can already play your first songs on your instrument after a short time. The combination of textbook and audio examples offers you the ideal start. All exercises and songs are available via QR code for listening or shown and played in detail in the learning videos. This way you can listen to everything exactly and play it back so that you can make fast progress.

Previous knowledge of sheet music is rarely required. You learn everything you need with the help of the individual exercises and songs. Learning to play is fun!
